# EJTIR Volume 16, Issue 1

## *Table of Contents*

Editorial board

## **Special Issue: Data-driven innovations in policy-oriented freight transport models and planning methods**

### **Editorial**

**Data-driven innovations in policy-oriented freight transport models and planning methods**

*Pages 1-3*

J. Gonzalez-Feliu, A. Goodchild and D. Guerrero

**Evaluating the impacts of urban freight traffic: application of micro-simulation at a large establishment**

*Pages 4-22*

P. T. Aditjandra, F. Galatioto, M. C. Bell and T. H. Zunder

**Use of discrete choice to obtain urban freight evaluation data**

*Pages 23-37*

J. Muñuzuri, J. Guadix, P. Cortés and L. Onieva

**Inventory theory, mode choice and network structure in freight transport**

*Pages 38-52*

F. Combes and L.A. Tavasszy

**Sensitivity analysis of impact model for road freight by the increase in the use of larger trucks in Spain**

*Pages 53-75*

P. J. Pérez-Martínez and R. M. Miranda

**Freeway truck travel time prediction for freight planning using truck probe GPS data**

*Pages 76-94*

Z. Wang, A. V. Goodchild and E. McCormack

# Special Issue: Climate Adaptation of Infrastructure Networks

## Editorial

### Special Issue on Climate Adaptation of Infrastructure Networks

*Pages 95-97*

L. Tavasszy, L.A. Bollinger and G.P.J. Dijkema

### Climate change in asset management of infrastructure: A risk-based methodology applied to disruption of traffic on road networks due to the flooding of tunnels

*Pages 98-113*

E. Huibregtse, O. Morales Napoles, L. Hellebrandt, D. Paprotny and S. de Wit

### Vulnerability of transport infrastructure to extreme weather events in small rural catchments

*Pages 114-127*

D. Michalis, L. Efthymis, S. Iraklis and M. Evangelos

### Quantifying the impact of adverse weather conditions on road network performance

*Pages 128-149*

M. Snelder and S. Calvert

### Innovations in weather services as a crucial building block for climate change adaptation in road transport

*Pages 150-173*

K. Pilli-Sihvola , V. Nurmi , A. Perrels , A. Harjanne, P. Bösch and F. Ciari

### Vulnerability assessment framework for interdependent critical infrastructures: case-study for Great Britain's rail network

*Pages 174-194*

R. Pant, J.W. Hall and S.P. Blainey

### Container terminal operations simulator (CTOS) - Simulating the impact of extreme weather events on port operation

*Pages 195-213*

P. Chhetri , G.B. Jayatilleke , V.O. Gekara , A. Manzoni and B. Corbitt

### Evaluating infrastructure resilience to extreme weather - the case of the Dutch electricity transmission network

*Pages 214-239*

L.A. Bollinger and G.P.J. Dijkema

### Impact of climate on pipe failure: predictions of failures for drinking water distribution systems.

*Pages 240-253*

B.A. Wols and P. van Thienen

### A layered approach to model interconnected infrastructure and its significance for asset management

*Pages 254-272*

S. Bhamidipati, T. van der Lei and P. Herder

### Joint Fact-Finding in Practice: Review of a Collaborative Approach to Climate-Ready Infrastructure in Rotterdam

*Pages 273-293*

T. Schenk, R.A.L. Vogel, N. Maas and L.A. Tavasszy
