Table of Contents

Editorial board

Special Issue: Advances in the Measurement of Transport Impedance in Accessibility Modelling

Editorial

Advances in the Measurement of Transport Impedance in Accessibility Modelling

Pages 294-299

K.T. Geurs and J. Östh

The impact of measuring internal travel distances on self-potentials and accessibility

Pages 300-318

A.M. Condeço-Melhorado, H. Demirel, M. Kompil, E. Navajas, P. Christidis

Distance deterrence, trade barriers and accessibility. An analysis of market potential in the European Union

Pages 319-343

M.H. Salas-Olmedo, P. García-Alonso and J. Gutiérrez

A new way of determining distance decay parameters in spatial interaction models with application to job accessibility analysis in Sweden

Pages 344-363

J. Östh, J. Lyhagen and A. Reggiani

Catchment areas of high-speed rail stations: a model based on spatial analysis using ridership surveys

Pages 364-384

H.S. Martínez, A. Moyano, J.M. Coronado and M. Garmendia

Integration of unobserved effects in generalised transport access costs of cycling to railway stations

Pages 385-405

L. La Paix and K.T. Geurs

Comparison of perceived and measured accessibility between different age groups and travel modes at Greenwood Station, Perth, Australia

Pages 406-423

M. Ryan, T. Lin, J. Xia and T. Robinson,
