Flood-related fatalities during the flood of July 2021 in North Rhine-Westphalia, Germany: what can be learnt for future flood risk management?

Annegret H. Thieken¹, Marie-Luise Zenker², Philip Bubeck³

Title: Erratum for flood-related fatalities during the flood of July 2021 in North Rhine-Westphalia, Germany: what can be learnt for future flood risk management?.

DOI: <https://doi.org/10.59490/jcrfr.2023.0005>

Published in: Journal of Coastal and Riverine Flood Risk, Vol. 2, Special Issue on “2021 Summer Floods in Europe”, paper 5.

Correction:

The original publication of the article titled " Fatal incidents during the flood of July 2021 in North Rhine-Westphalia, Germany: what can be learnt for future flood risk management?" on <https://journals.open.tudelft.nl/jcrfr/article/view/6954> contained an error in the title displayed on the landing page. The correct title should be "Flood-related fatalities during the flood of July 2021 in North Rhine-Westphalia, Germany: what can be learnt for future flood risk management?."

Explanation:

Due to an oversight during the publication process, the landing page displayed an incorrect title. The content of the article itself, as found in the PDF version, remains accurate and unchanged.

Actions Taken:

The landing page title has been corrected to "Flood-related fatalities during the flood of July 2021 in North Rhine-Westphalia, Germany: what can be learnt for future flood risk management?."

Note to Readers:

We apologize for any confusion caused by the discrepancy. The correction has been made to the landing page title to ensure accuracy.
